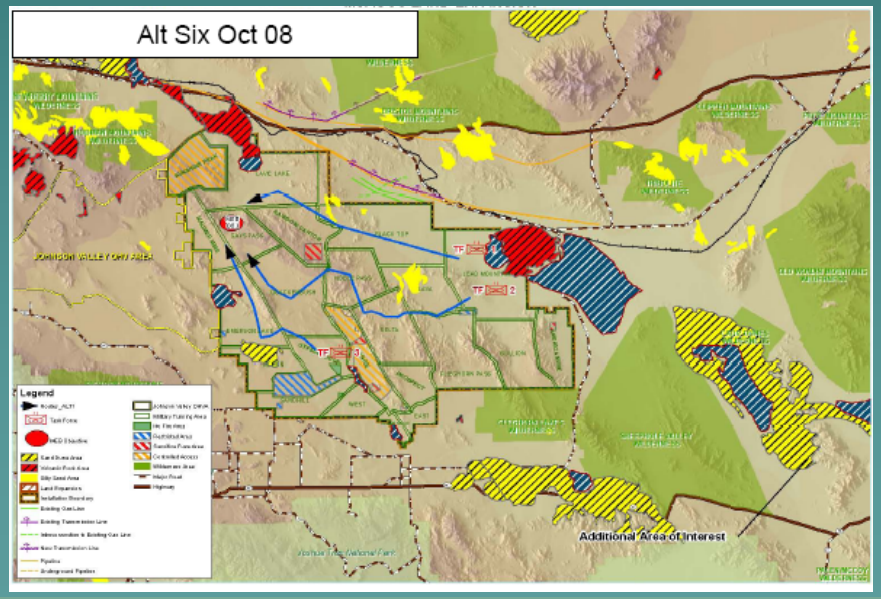
Proposed 29Palms Training Land / Airspace Acquisition Project

No Action Alternative

(Current Base)

- **Adds No land; changes no airspace**
- **Maneuver would start aboard MCAGCC in the east and central parts of the base and the MEB battalions would converge on an objective in the northwest area of the current MCAGCC base**



Alternatives Will Be Assessed Against These Factors

Critical Training Requirements

- Three Battalion Task Forces abreast converging onto a MEB objective
- 48-72 hours of continuous offensive operations toward the MEB objective
- Integrated air and ground live fires with optimized freedom of action (within reasonable constraints)

Other Evaluation Criteria

- Maneuverability: unconstrained tactical maneuver/movement that supports both restricted and open terrain environments
- Live Fire: continuous complex live-fire execution and coordination at the Regimental Combat Team and Battalion Task Force levels
